The following inventory contains information about a variety of funding programs offered by various entities for flood-related, general water management, and water supply projects. This document is intended as a resource for local sponsors whose projects do not qualify for funding from the North Dakota State Water Commission, or for those seeking additional funding partners.
Emergency Watershed Protection Program

The program is designed to help people and conserve natural resources by relieving imminent hazards to life and property caused by floods, fires, windstorms, and other natural occurrences. EWP is an emergency recovery program. All projects undertaken, with the exception of the purchase of floodplain easements, must have a project sponsor. This is a grant program for individuals and larger political entities, although it requires that states, counties, cities, general improvement districts, conservation districts, or Indian tribal governments be involved as a local sponsor.

Watershed & Flood Prevention Operations Program

The Watershed and Flood Prevention Operations (WFPO) Program provides technical and financial assistance to states, local governments and Tribes (project sponsors) to plan and implement authorized watershed project plans for the purpose of: watershed protection; flood mitigation; water quality improvements; soil erosion reduction; rural, municipal and industrial water supplies; irrigation; water management; sediment control; fish and wildlife enhancement; and hydropower. This is a grant program, with eligibility by states, local units of government, and Indian tribal governments.

Community Development Block Grant Disaster Relief

The CDBG Program provides financial assistance to eligible units of local governments in the form of grants and loans for public facilities, housing rehabilitation, and economic development projects. The primary beneficiaries of these projects must be very low and low-income individuals. The state may be eligible for CDBG Disaster Relief funds upon declaration of a federal disaster. This is a grant and loan program for select local units of government recovering from a federal declared disaster.

Public Assistance Program

FEMA Public Assistance funds are made available through NDDES to repair eligible infrastructure damage caused by a disaster beyond local and state government recovery capability. This is a supplemental aid program with eligibility by state, local, tribal, and qualified private non-profit entities.

Hazard Mitigation Assistance Program

FEMA provides funding through this program to significantly reduce or permanently eliminate future risk to lives and property from natural hazards. This is a collection of related grant programs, with eligibility by state, local, or tribal units of government, and eligible private non-profit groups.

http://www.fema.gov/hazard-mitigation-assistance
Continuing Authorities Program

USACE can provide Emergency Assistance in preparation for a flood along with providing a variety of programs in support of long-term flood mitigation assistance under their Civil Works Program.

Under the Continuing Authorities Program (CAP), the Corps of Engineers is authorized to plan, design, and construct flood-related projects. This is a grant program with eligibility by non-federal sponsors.

North Dakota Regional Councils

Provide guidance and assistance on a wide variety of federal/state grant and loan programs. The type of funding source and eligibility varies.

http://www.business.nd.gov/data/regional/
The National Fish Passage Program

This program is a voluntary, non-regulatory initiative. The U.S. Fish and Wildlife Service provides funding and technical assistance to reconnect aquatic habitats, such as the installation of fish passages on dams. This is a grant program, with eligibility to private individuals and governmental entities.

North Dakota Outdoor Heritage Fund

The North Dakota Outdoor Heritage Fund was established in 2013 to provide grants to state agencies, tribal
governments, political subdivisions, and nonprofit organizations, with higher priority given to projects that enhance
conservation practices in this state by:

**Directive A** - Providing access to private and public lands for sportsmen, including projects that create fish and wildlife
habitat and provide access for sportsmen;

**Directive B** - Improving, maintaining and restoring water quality, soil conditions, plant diversity, animal systems, and
by supporting other practices of stewardship to enhance farming and ranching;

**Directive C** - Developing, enhancing, conserving and restoring wildlife and fish habitat on private and public lands; and

**Directive D** - Conserving natural areas and creating other areas for recreation through the establishment and
development of parks and other recreation areas.

Community Water Facility Revolving Loan Fund

The Community Water Facility Revolving Loan Fund was established by the North Dakota legislature in 1978. Monies transferred to this fund are used primarily for supplemental financing in conjunction with the USDA Rural Development (RD) - formerly FmHA/FSA - for community water projects. The program was established to provide financing for community water projects when the project is above the maximum loan limits set by RD. It is also the intent of this program to provide supplemental financing for federal loan programs associated with community water projects. Loans from this fund are made in accordance with N.D.C.C. Chapter 6-09.5. This is a loan program for local units of government.

Infrastructure Loan Fund

This program provides loans to political subdivisions for new infrastructure projects as directed by House Bill 1443 of the 64th Legislative Assembly. Projects which begin construction in 2016 will be given priority. These funds may only be accessed if other state and federal programs are not available to fully fund or provide any funding for the project.

The funding availability for the first year of the 2015-2017 biennium will be $50 million for communities with a population of less than 2,000 and $100 million for communities with a population greater than 2,000 as defined in the most recent U.S. Census data source.

This loan program may be used for the new construction of the following project examples: water or wastewater treatment plants; sewer, storm sewer and water lines; and transportation infrastructure, including curb and cutter. Flood control projects are not eligible for funding through this program.

Rural Community Assistance Partnership (RCAP) Revolving Loan Fund

The RCAP Water and Wastewater Revolving Loan Fund was established with the help of the U.S. Dept. of Agriculture’s Rural Utility Service to provide low-interest loans to eligible water and wastewater systems. The funds available through RCAP’s Revolving Loan Fund can be used for pre-development expenses necessary to secure permanent financing for major capital improvements, or funding for small capital improvement projects to preserve, improve, or enhance the services of the system. Such improvement projects may include funding for water and/or wastewater treatment-plant improvements and upgrades, sewer-line extensions to existing un-sewered properties, water-line extensions to un-served properties, water storage facility improvements, equipment purchases and much more. This is a grant program for local units of government with populations of 10,000 or less, and specific non-profit groups.

http://www.rcap.org/rlf

Water & Waste Disposal Direct Loans and Grants

The purpose of this program is to develop water and waste disposal systems in rural areas and towns with a population not in excess of 10,000. This is a loan and grant program with funding available to public bodies, non-profit corporations and Indian tribes.

http://www.rurdev.usda.gov/UWP-dispdirectloansgrants.htm
Rural Water & Waste Disposal Loan Program

CoBank offers a broad range of flexible loan programs with a variety of interest rate alternatives, including fixed and variable rates. They provide short-term financing for working capital and project construction. Intermediate and long-term loans are available to construct new facilities, remodel or expand existing facilities, purchase land or equipment, finance long-term assets, and refinance existing debt in water and waste disposal projects. Communities with populations less than 20,000 are eligible for this loan program.

http://www.cobank.com
Rural Development Revolving Loan Fund

The Revolving Loan Fund was established with a grant from the USDA to provide financing to eligible utilities for pre-development costs associated with proposed water and wastewater projects. Funds can also be used with existing waste/wastewater systems and the short-term costs incurred for replacement equipment, small-scale extension of services or other small capital projects that are not a part of regular operations and maintenance. This is a loan, with amounts not to exceed $100,000 or 75% of the total project cost, whichever is less. Communities with populations of 10,000 or less, and rural areas with no population limit are eligible for this program.

www.ndrw.org
Capital Financing Program

This program makes loans to political subdivisions for the purpose of financing projects or improvements for which political subdivisions are legally authorized to borrow money through the issuance of municipal securities. Subject to credit requirements and certain program requirements, financing is available in any dollar amount. The loan program is for local units of government.

http://www.nd.gov/pfa/cfp.html

State Revolving Fund Program

The State Revolving Fund (SRF) Program grants, received from the United States Environmental Protection Agency, are to be used to make below-market interest rate loans to political subdivisions for the purpose of financing authorized projects, to establish reserve funds, and for other purposes allowed under the Clean Water and Safe Drinking Water Acts. Authorized projects under the SRF include wastewater treatment facilities, non-point source pollution control projects, and public water systems. The North Dakota Department of Health and the North Dakota Public Finance Authority jointly administer the SRF. This loan program is for local units of government.

http://www.nd.gov/pfa/srf.html
Disaster Financing Program

This program provides disaster assistance to political subdivisions affected by weather related events, until federal and state money is available or to assist in cash flowing local match requirements. The political subdivision must submit a Capital Financing Program Disaster Financing application to the PFA. The political subdivision must show ability to repay the financing either from federal or state government disaster payments or from tax receipts. This loan program is for local units of government that have received a Presidential Public Disaster Declaration or a gubernatorial executive order or proclamation of a state disaster or emergency.

http://www.nd.gov/pfa/disaster-financing.html
North Dakota Rural Water Finance Corporation Interim Financing Program

This program is structured to provide a mechanism for obtaining competitive fixed rate loans for construction projects at a very low cost of borrowing, in order to provide funding for communities which have received a permanent loan commitment from the USDA, Rural Development or the Bank of North Dakota’s Community Water Facilities Revolving Loan Fund. This is a loan program for local units of government.

http://www.ndrw.org/membership/members/interim-financing/
RCAC’s Loan Fund is a financial resource for rural communities. This program is designed to fill financing gaps and serve those traditionally neglected by conventional markets. The loan fund offers a comprehensive array of loan products for affordable housing development, environmental infrastructure, community facilities and businesses in rural locations. Each RCAC loan product is designed to meet the unique loan structure needs of the applicant. This is a loan program for nonprofit organizations, public bodies and tribal governments for affordable housing, community facilities and environmental infrastructure projects. For profit entities and sole proprietorships as well as nonprofit organizations, and tribes or tribal designated entities, may qualify for business loans. In addition, tribes may be eligible for “work force housing” loans.

Title XVI – Water Reclamation & Reuse Program

The Title XVI Water Reclamation and Reuse Program focuses on identifying and investigating opportunities to reclaim and reuse wastewater and naturally impaired ground and surface water. It has the potential to provide communities with a new source of clean water while promoting water and energy efficiency and environmental stewardship. This is a grant program for communities.

The WIFIA program was established by the Water Infrastructure Finance and Innovation Act of 2014. The WIFIA program accelerates investment in our nation’s water infrastructure by providing long-term, low-cost supplemental loans for regionally and nationally significant projects. WIFIA can fund development and implementation activities for eligible projects such as wastewater conveyance and treatment projects, drinking water treatment and distribution projects, enhanced energy efficiency projects at drinking water and wastewater facilities, desalination, aquifer recharge, and water recycling projects, acquisition of property if it is integral to the project or will mitigate the environmental impact of a project, and a combination of eligible projects secured by a common security pledge or submitted under one application by an SRF program. The WIFIA Program is a loan program for local, state, tribal, and federal governmental entities, partnerships and joint ventures, corporations and trusts, and Clean Water and Drinking Water State Revolving Fund (SRF) programs.
